WORK EXPERIENCE

Full Stack Developer - [HypedX](#) - by Digital Gimmick **november 2025 - present**

- Maintained and developed features for a full-stack YouTube views marketplace using Next.js frontend and Node.js/TypeScript backend.
- Implemented AI-powered features using **OpenRouter** and **Vercel AI SDK** for automated tag generation and content optimization.
- Built automated MongoDB backup system with cron jobs (6-hour intervals) and **Cloudflare R2** integration for cloud storage with automated cleanup policies..
- Handled API rate-limiting on all tools of our platform.

PROJECTS

[CodeStash](#) - Store and share code snippets

[Production Site](#) - [Source Code](#)

- Codestash is a full-stack web app where developers can share, store, and discover code snippets.
- **AI-Powered Code Explanations:** Get AI-generated explanations for code snippets.
- **VS Code Integration:** Open code snippets in VS Code.
- Handled API rate-limiting on AI features.
- Support for the most used programming languages.
- Fully responsive for mobile devices.

[SpendSync](#) - Finance Tracker

[Production Site](#) - [Source Code](#)

- An all in one financial planning and money tracking tool with a sleek and intuitive user interface.
- Built with MERN Stack (MongoDB, Express.js, React, Node.js) and uses modern technologies like Typescript, TailwindCSS, Shadcn, React Query and Chart.js.
- Mature codebase with over 6,000 lines of code and 200 git commits written with the best practices in both frontend and backend technologies.
- Implemented the following features.
 - Custom token based authentication and authorization with json-web-token and Bcrypt.
 - Payment gateway using Stripe for premium users.
 - Image upload and receipt upload with Multer and Cloudinary.

TECHNICAL SKILLS
